Sofía Cárdenas Rosas

INFORMATION SYSTEMS ENGINEER

I am a recent graduate of Information Systems Engineering with great interest on software developing. I am looking for oportunities that allow me make use of my abilities to contribute in the development of innovative solutions.

PROJECTS

Technical Writer (dogOS)

- The system dogOS is an integral web solution to improve the operative efficiency and client experience for this hot dog cart business. The app would allow the client to order food from the menu, and the admin would manage those orders (acept or reject).
- I worked closely with the developers and testers to create user-friendly documentation, specially writing the user manual and installation guide.

Project Manager & Back-End Developer (VerdeXpress)

- I participated for a while in Back-End; I was in charge of making sure the donations and parks information showed up correctly. My main assignment was task planning, and write the user and administrator manuals.
- VerdeXpress was built as a platform designed for the park and gardens registration, in which then people could donate monetary or in-kind donation, with the goal of boost the conservation of green areas in Hermosillo.

EXPERIENCE

SICT (Professional Internship)

July 2026 - October 2026

- I was able to apply and expand my IT knowledge in a real-world work environment. Handling IT service requests helped strengthen my diagnostic skills under pressure and enhanced my interpersonal abilities when interacting directly with users across various hierarchical levels.

KFC

July 2024 - April 2025

- I worked for 9 months in KFC Galerias Mall, where I grew as a worker and expanded my abilities on teamwork and problem resolution, since attention to detail and effective communication are key for high-pressure, fast-paced settings like restaurants.
